

Do you want to get a taste of **start-up vibes** and unlock your creativity to master exciting challenges? Work in a fun and **ever-growing team** with a modern office and great public transport connections? Arrange your work-hours flexibly and have the possibility to work from home? Get all the free coffee you want and **kick off your evening with some beer** on the rooftop terrace? If this sounds good to you, then: board the rocket and fast-track your career at notarity.

full-stack developer (f | m | d) - full time

notarity

- notarity is growing a Vienna-based **tech start-up** on a mission to modernize legal processes. Let's grow together!
- our first task revolves around digital notarial processes. **we seek to make going to the notary public as easy as ordering a pizza**
- we develop software that enables notaries to **offer remote online notarizations** and users to notarize documents anywhere and anytime.
- we want to grow quickly and conquer other markets in **Europe and the World**
- we have entered one of the most emerging markets - join us on this mission to **become the first legal tech unicorn**
- as we are **early-stage**, you have a direct influence on our product (and business model) - build something great with us

offering

- competitive **salary** (depending on qualification) Junior Devs starting at 42 k / year (gross)
- an amazing and **flexible startup atmosphere** with highly motivated and open-minded colleagues
- modern & developer friendly **TechStack** (Svelte.js; NodeJS, No-SQL-database)
- work in a small and self-organized team with **agile development** processes and CI/CD
- opportunity to be creative and have a direct **impact on the product and beyond**
- flexible working hours, in our **modern office** in the heart of Vienna or remote
- **team events** on a regular basis; extras like bike rentals, ticket for public transportation, coffee, beer, snacks, etc.

you

- first relevant **professional experience** in web development (backend and frontend)
- you bring some experience with **NodeJS in a productive environment**, as well as knowledge of modern web technologies
- experience with **cloud computing** and document oriented databases is an advantage
- experience with **product management** and **product ownership** is an advantage
- ability and motivation to **quickly learn new frameworks**
- independent and **structured** approach to work
- you can work **self-organized** and you show high level of **engagement**
- fluent in English or German

challenges

- learn our tech stack and become an effective **member of the team**
- together with our dev team, you conceptualize and implement **new features**
- produce clean and well-tested **frontend and backend code**, diagnose defects and provide effective solutions
- you **design processes** in cooperation with notaries and clients and implement them
- you like to try out new things, have ideas to **challenge the status quo**, you are not afraid of mistakes and roll up your sleeves to make things happen
- contribute to write **clear specifications, documentation and tests**
